# CONCRETE FOUNDATIONS

where a concept becomes a concrete foundation

COMPANY OVERVIEW

Founded in 2008 as a training solutions company, Concrete Foundations (CF) has provided consulting services, training development and support, as well as procurement and staff augmentation solutions to companies such as Telos, STG Inc, Reliant Energy, NRG, ATI, redShoe, and TSM to name a few. Through CF's efforts these companies were able to provide support for their current positions as well as offer extended solutions for various Government and external Commercial projects. Since 2008 the list of clients and partners for CF has expanded and CF has had the privilege of providing services, contractors, and turn-key solutions, for a diverse client base within the private and public sector.

Concrete Foundations primary focus is to provide high-level turn-key solutions within the IT Arena. Although Concrete Foundations is an IT Training Solutions firm, it in fact specializes in full life cycle support and project oriented solutions as well as personnel support. In addition to its solution driven support model, Concrete Foundations maintains a base of exceptionally qualified resources for a wide variety of IT needs, including but not limited to Virtualization, Security Compliance, Analyst and Developer roles. Concrete Foundations prides itself on a skill and project driven business model. Which in turn leads to high retention rates and low turn-over rates thereby offering greater project stability and a more solid infrastructure than its competitors.

CUSTOMIZED SUPPORT

In addition to project and contract support, Concrete Foundations is well skilled in supporting proposal efforts, contingent and actual, as well as short term personnel augmentation. Areas of strength are:

- Training Delivery and Development
- SAP, ERP, and CRM
- Virtualization

- Middleware Implementation
- Data Warehousing
- Systems & Applications Programming and Support
- QA and IA Testing
- Network Administration
- Security Project Management
- Encrypting
- Process Development
- Software Development

Concrete Foundations aim is to provide the most rapid, quality oriented, cost-effective solutions, while maintaining a strict policy of corporate standards and compliance. As a result of the company's drive towards customer support and budget fitting IT solutions, Concrete Foundations is skilled in managing BPA's as well as standalone requirements to meet the needs of our customers. Concrete Foundations is well skilled in providing turn-key teams for various IT Solutions and can deliver customized teams to meet a variety of IT efforts and budgets.
